Conflict Resolution Methodology

This document outlines the processes and methods that will be taken if a conflict occurs within the team or member of the team listed above. There are 3 different metrics to measure the level of conflicts, minor, moderate and serious and the steps to resolve them.

How to define the conflict level

The three levels of conflicts are minor, moderate and serious this section of the document outlines how to identify the conflict and categorise them into the groups respectively as shown in figure 1.

Severity Level	Key Indicators	Common Examples
Minor	- One off incident - Zero impact to safety - Easily brushed off or handled in minutes	- Disagreement over minor plans or preferences
Moderate	- Recurring pattern or unresolved issue - Affects daily workflow - Strains communication and trust	- Missing deadlines - Not doing allocated work
Serious	- Threats to physical, emotion or organisational health - Violates trust and safety of others - Refusal to engage constructively	- Harassment, discrimination or abuse language
